CGPA: 7.4

Year: 2021

Percentage: 86

TECHNICAL SKILLS

Programming: Java, C Language

Frontend: HTML, CSS, Javascript, React js

Database: Mysql

Data Analytics: Powerbi

PROFESSIONAL EXPERIENCE

Icanio Technologies : Tirunelveli

06/2023 – 07/2023

- "I interned at Icanio Technologies in Tirunelveli, where I focused on frontend development using React JS. During my tenure, I contributed to creating responsive and user-friendly web interfaces. My key projects included developing a dynamic Nexcent webpage that adapts seamlessly across devices and designing a student sign-up page with efficient functionality and an intuitive layout. These experiences honed my skills in React JS, responsive design, and user interface development, providing me with valuable practical exposure to web development processes."

ACADEMIC PROJECTS

Portfolio Website Using React js

- A responsive portfolio built with React JS showcasing skills, experience, and projects in a modern, user-friendly design. It features sections like Home, About, Projects, Experience, and Contact, all styled with CSS frameworks like Tailwind CSS or Bootstrap. The layout adapts seamlessly to all devices using Flexbox, Grid, and media queries, ensuring an optimal viewing experience. Additional features include animations, interactive elements, and deployment on platforms like GitHub Pages or Netlify for accessibility and professional presentation.

Perfido Website

- Designed and developed code testing application that allows users to submit code, run automated tests, and receive real-time feedback on performance. Integrated test case management to ensure comprehensive coverage and provide detailed reports, improving code quality and development efficiency. Technical Languages : JavaScript(React.js)

Bakery Sales Analysis using Power bi

- An interactive Power BI dashboard was developed to analyze bakery sales and customer preferences. It features dynamic visualizations to track sales trends daily, weekly, and monthly, with a focus on key metrics such as total sales, revenue growth, and seasonal patterns. The dashboard highlights top-performing items, category-wise sales distribution, and overall business performance. Interactive filters and slicers allow users to drill down into specific time periods, product categories, or customer segments for deeper insights. This tool provides actionable data, enabling better decision-making and strategic planning for optimizing inventory, improving customer satisfaction, and boosting overall sales efficiency.

AREA OF INTEREST

- Fullstack Web development

SOFT SKILLS

- Team Work
- Confident & Dilligent
- Problem Solving

HOBBIES

- Playing
- Music
- Farming Land

ACHIEVEMENTS

- Participated in zonal-level cricket representing my college, showcasing teamwork, leadership, and athletic skills. Contributed to the team's performance through dedication and collaboration, demonstrating a strong passion for sports and extracurricular involvement.
- School Topper of the year 2020 - 2021 in Government Higher Secondary School.
